ABOUT US

ETI S.p.A.

Founded in 2000, the company builds, maintains and repairs plants and infrastructure for the transport and treatment of fluids in the oil & gas and water sectors, and has developed a high level of expertise in welding.

REGISTERED OFFICE San Donaci (BR)	OPERATIONS Guagnano (LE)
COMMERCIAL OFFICE Cesena (FC)	MARKET Euronext Growth Milan

VISION

Our vision

To become a global partner for construction projects, supporting our partnerships with safety, quality, punctuality and leadership, with customer satisfaction and sustainable growth as priorities.

OUR PATH

2000

Founded as Eurotecnoimpianti S.r.l., specialised in passive and active protection.

2016

A pool of managers, including the current Managing Directors, joins to launch a development and internationalisation plan.

2021

Renamed ETI and converted into an S.p.A.

2026

Debuts on Borsa Italiana, Euronext Growth Milan.

Our services

01

Pipeline construction

Prefabrication, welding and assembly, onshore and offshore.

02

Energy infrastructure

Storage, compression and bypass stations.

03

Water infrastructure

Aqueducts and service networks, tested and certified.

04

Industrial construction

Chemical and civil industrial plants.

05

EPC services

Engineering, procurement and construction.

06

Energy transition

Works for new energy carriers, hydrogen included.

07

Marine works

Piping and steelwork on board and in the yard.

08

Gas and district heating

Distribution, connections and urban networks.

PIPELINE CONSTRUCTION

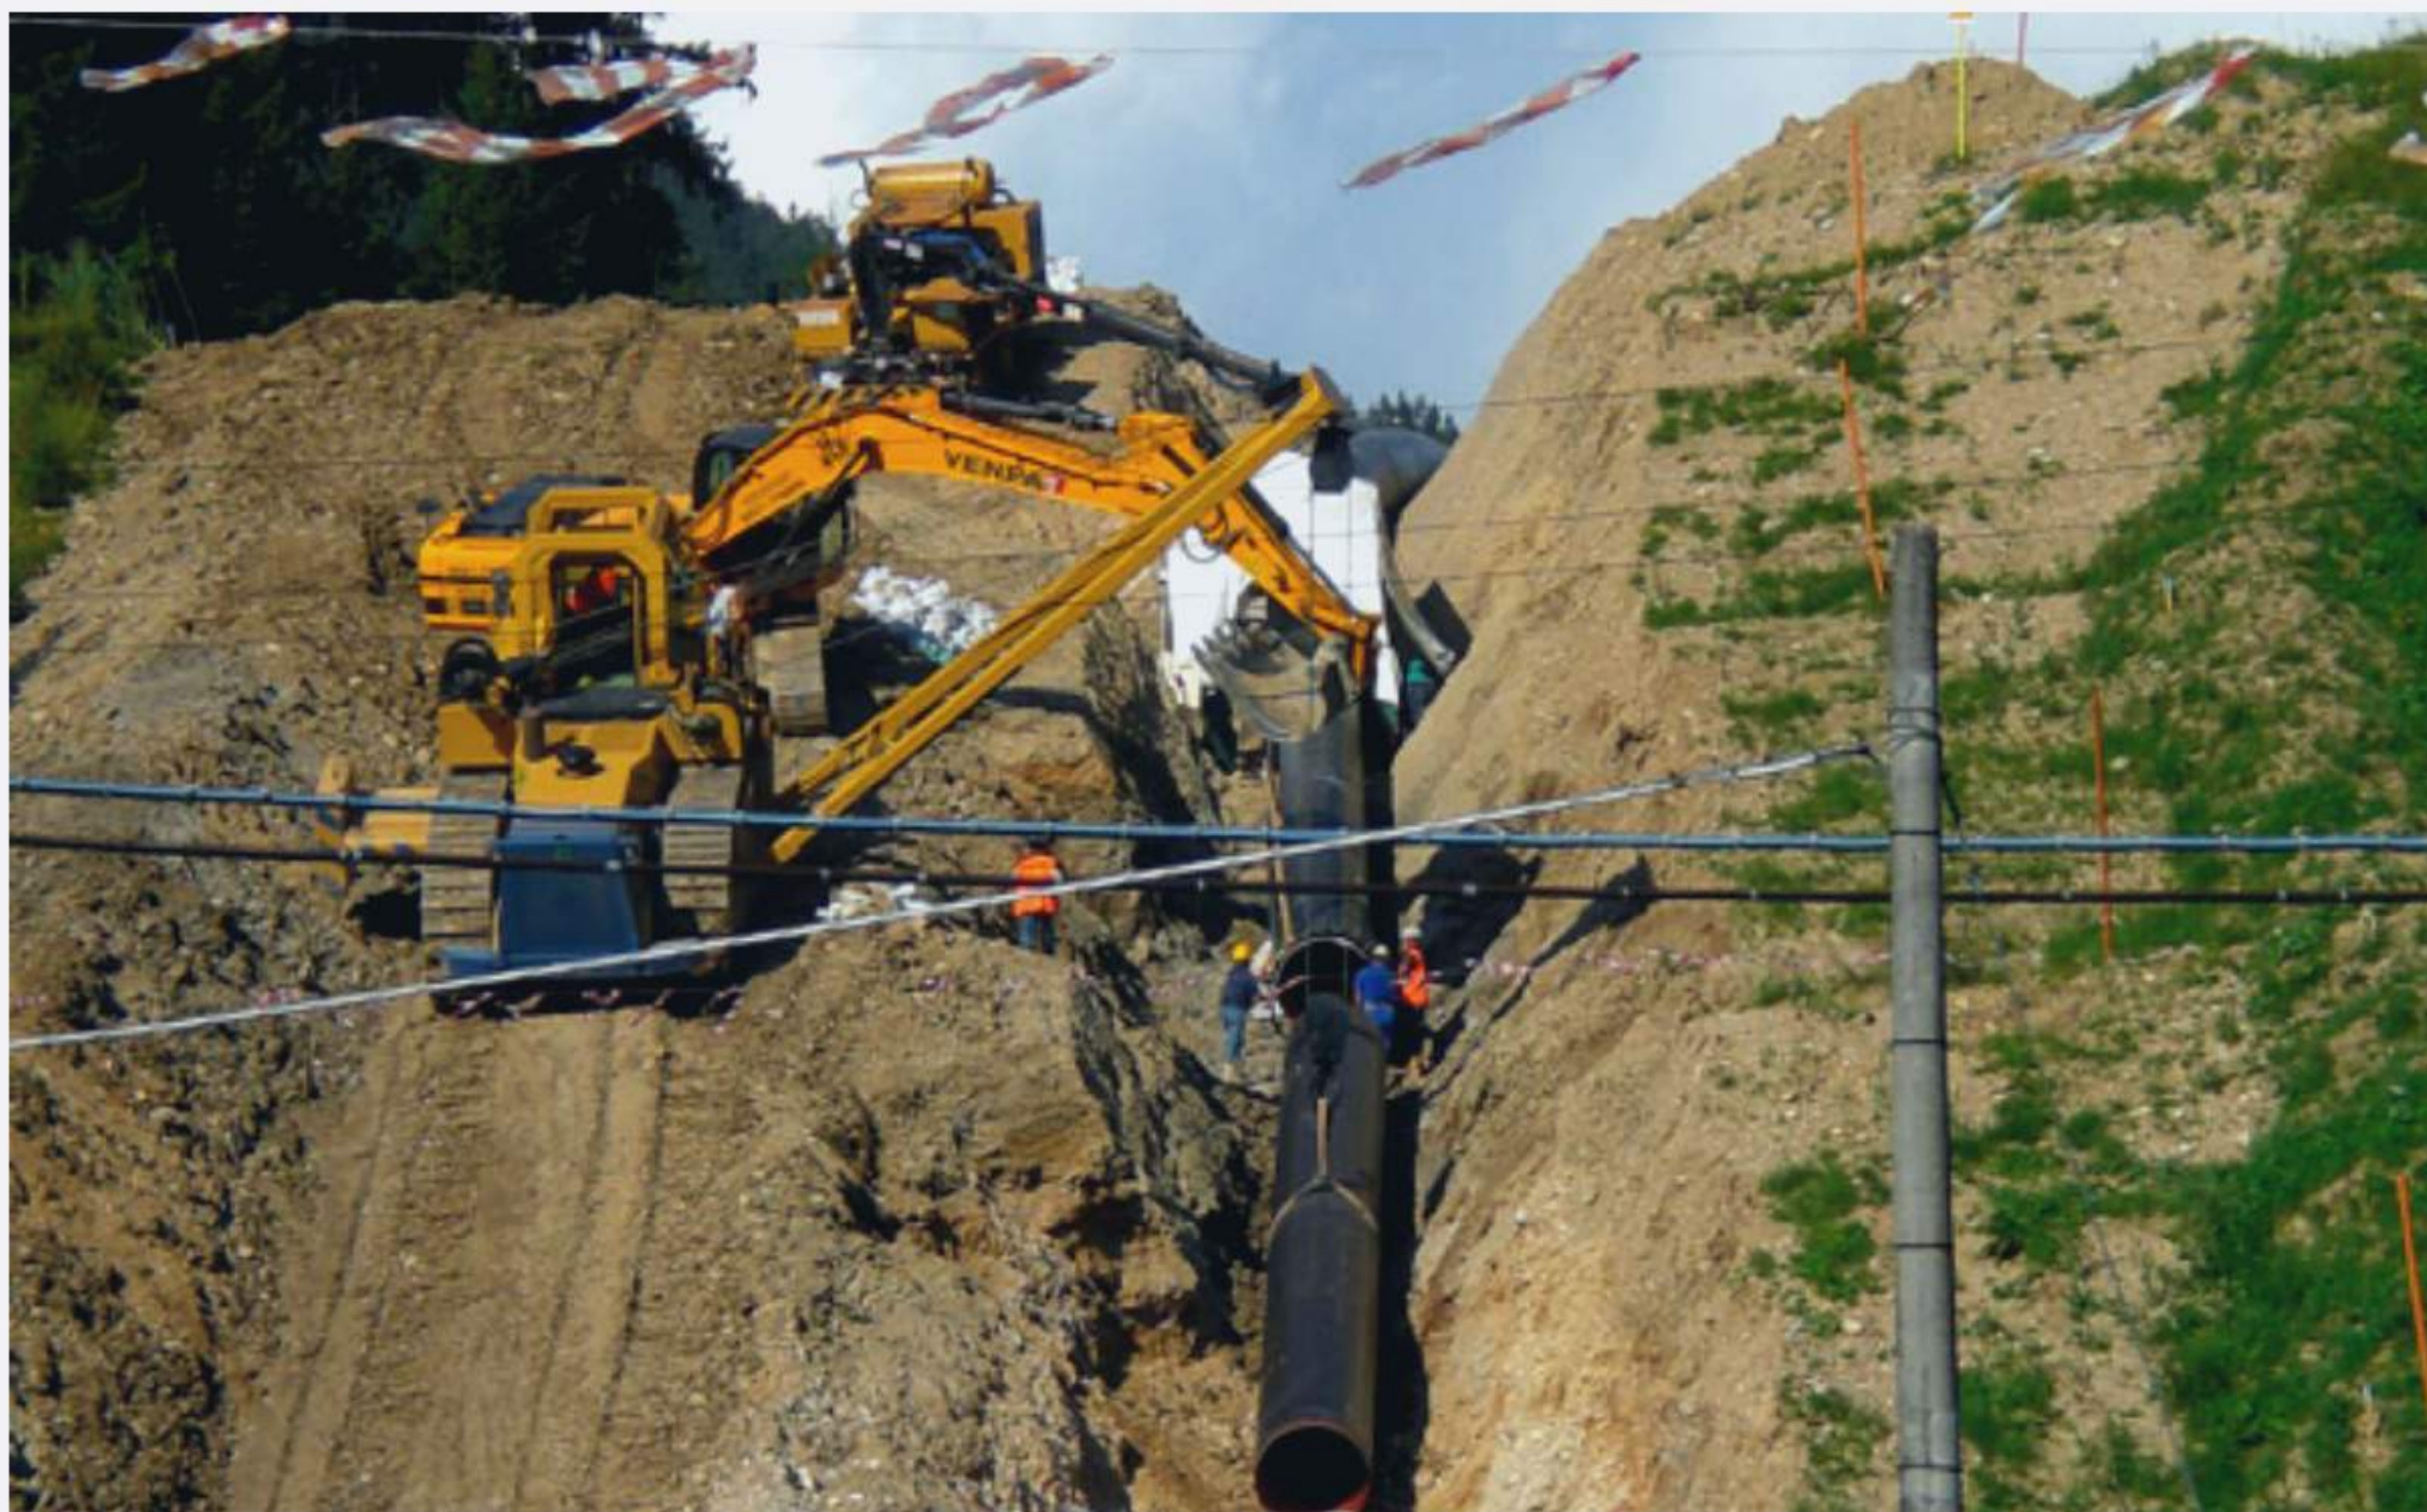

Pipeline construction

Construction, laying and maintenance of onshore pipelines for gas, water and multi-utility infrastructure.

- Prefabrication and welding
- Excavation, laying and backfilling
- Hydrostatic testing and certification
- Maintenance and repairs

ANKLAM, DE • 2018

ETZEL, DE • 2025

BRNO, CZ • 2022

ENERGY INFRASTRUCTURE

Energy infrastructure

Construction, installation and maintenance of stations and plants for gas transport, compression, metering, regulation and treatment.

- Mechanical assembly
- Piping and steelwork
- Active and passive protection
- Plant revamping

GOŁENIÓW, PL · 2021

EGGENDORF, AT · 2024

UDINE, IT · 2025

Water infrastructure

Construction, installation and maintenance of aqueducts, large pipelines and infrastructure for water transport, distribution and management.

- Steel and cast iron pipelines
- Crossings and structures
- Tanks and pumping stations
- Testing and certification

SPELLO (PG), IT · 2023

GINOSA (TA), IT · 2023

BAT, IT · 2024

INDUSTRIAL CONSTRUCTION

Industrial construction

Construction, installation and maintenance of piping, equipment, steel structures and mechanical systems for industrial plants.

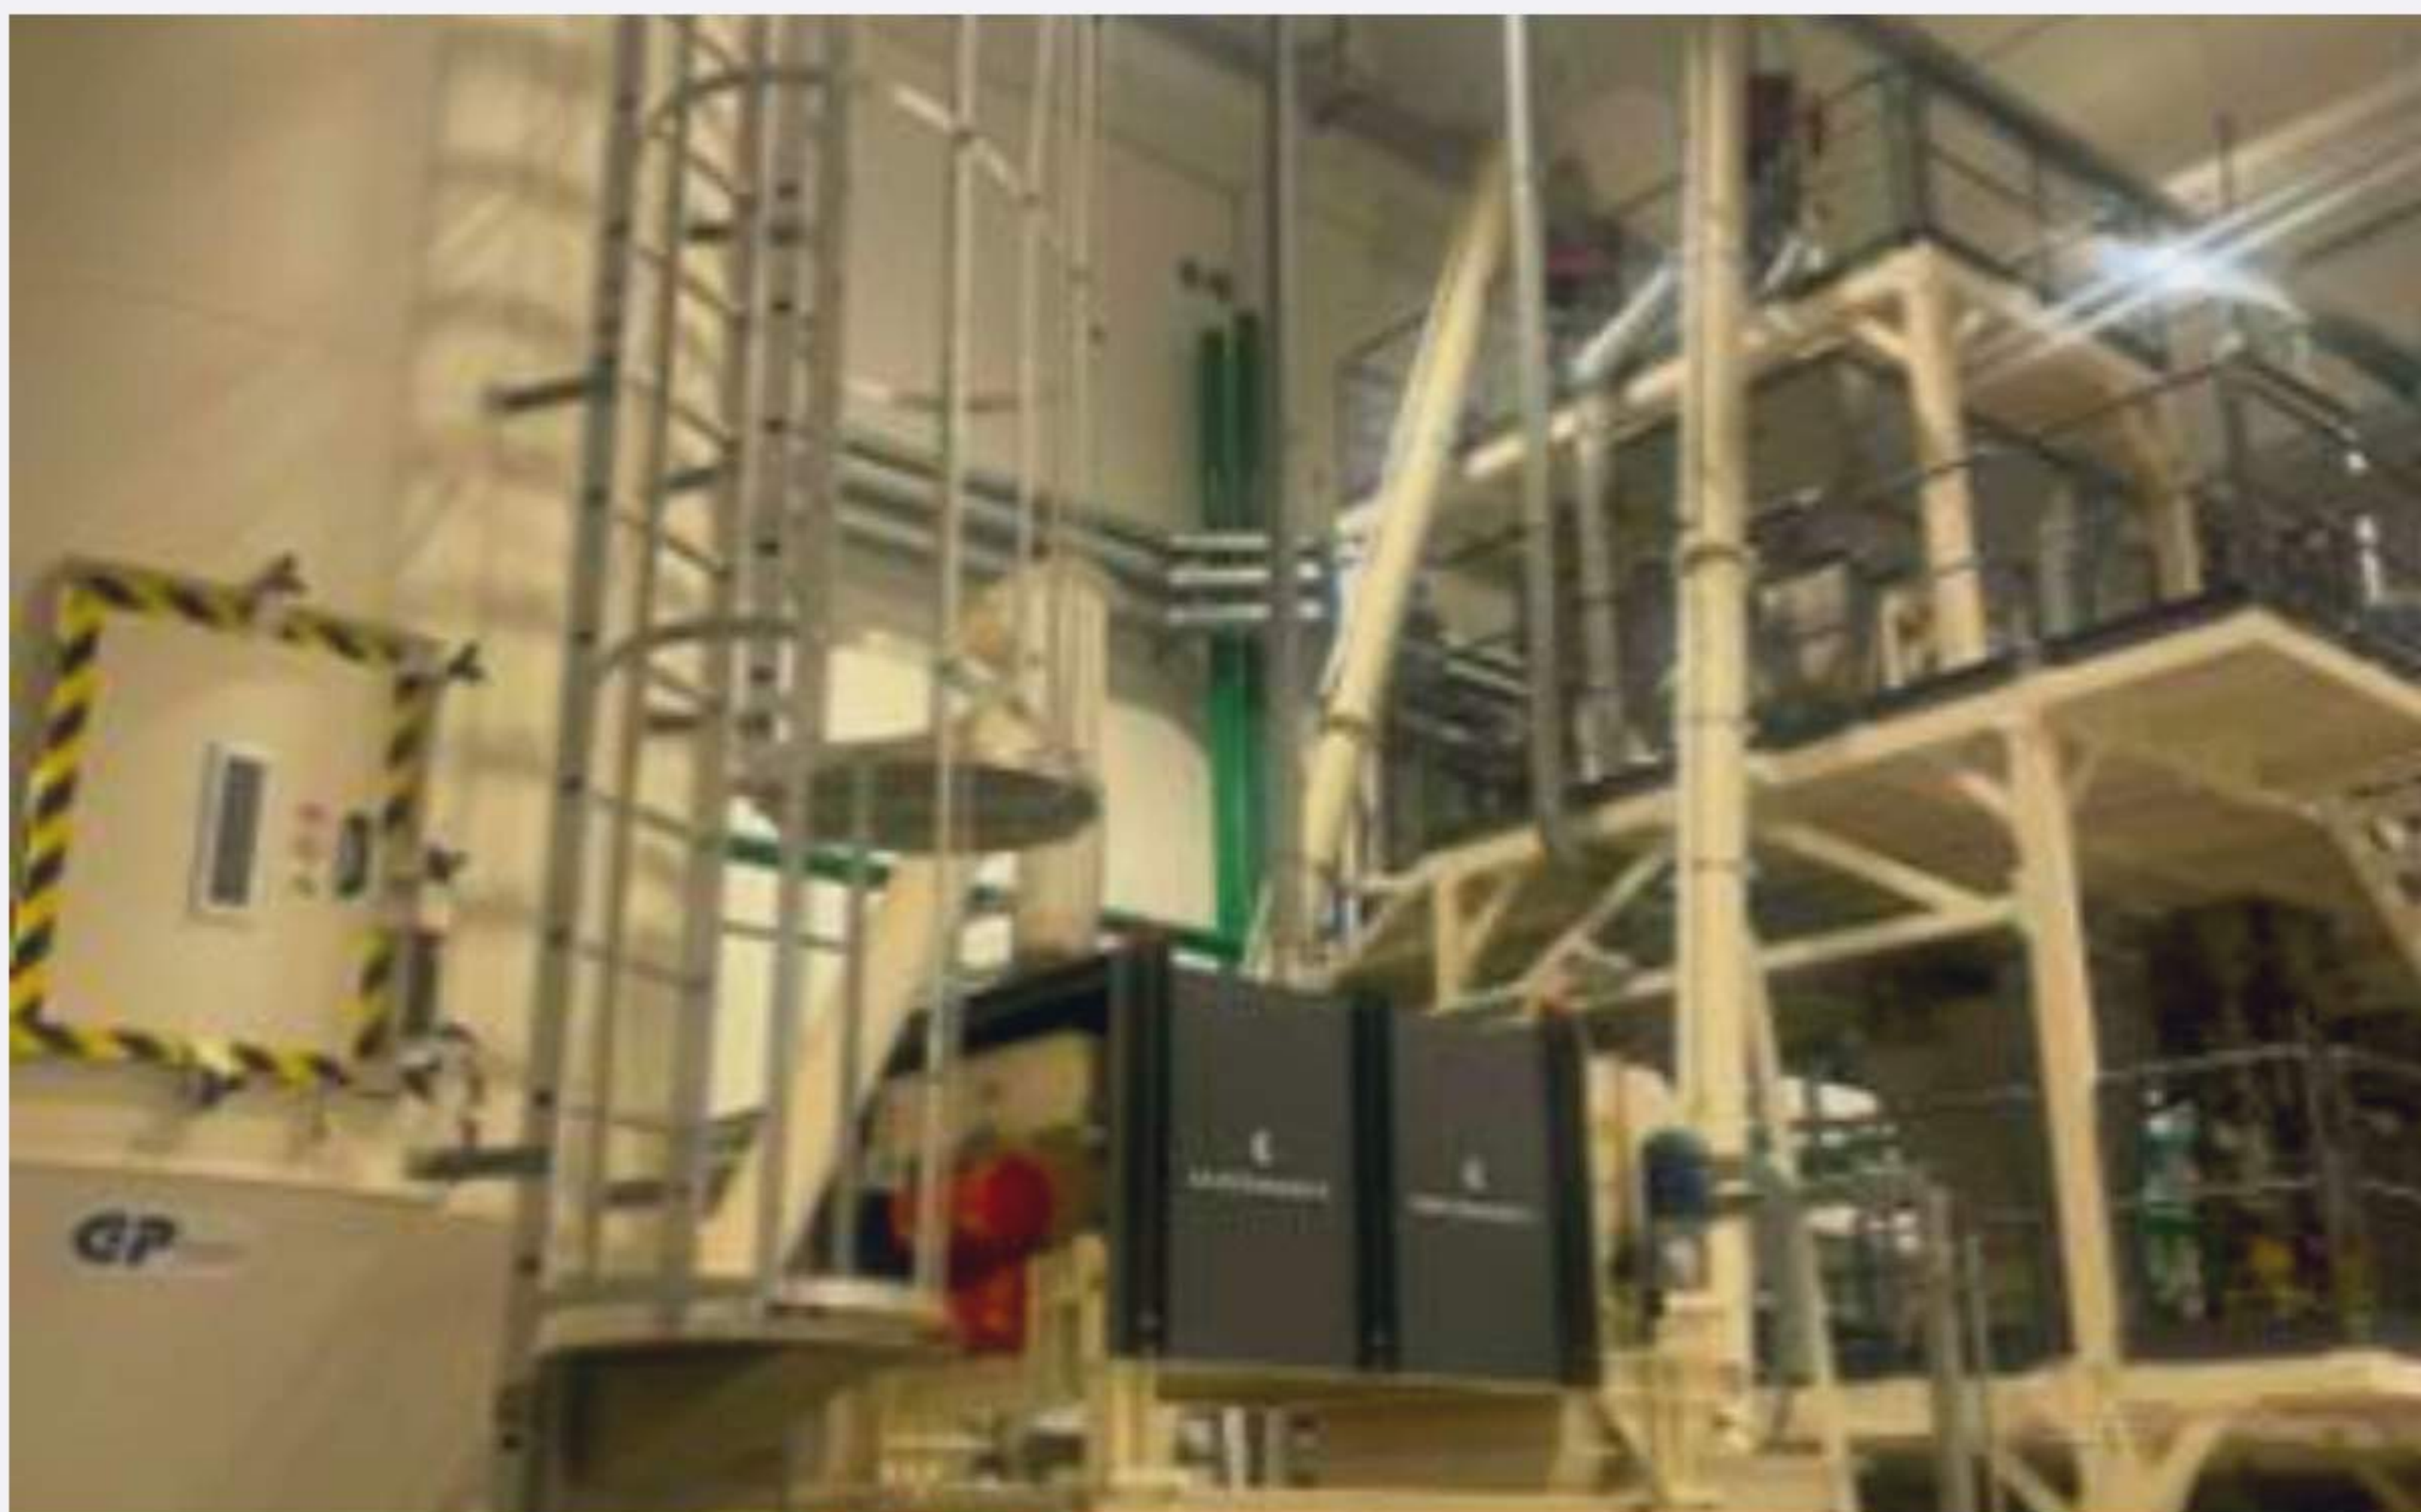

- Process piping
- Steel structures
- Equipment and mechanical systems
- Chemical and civil plants

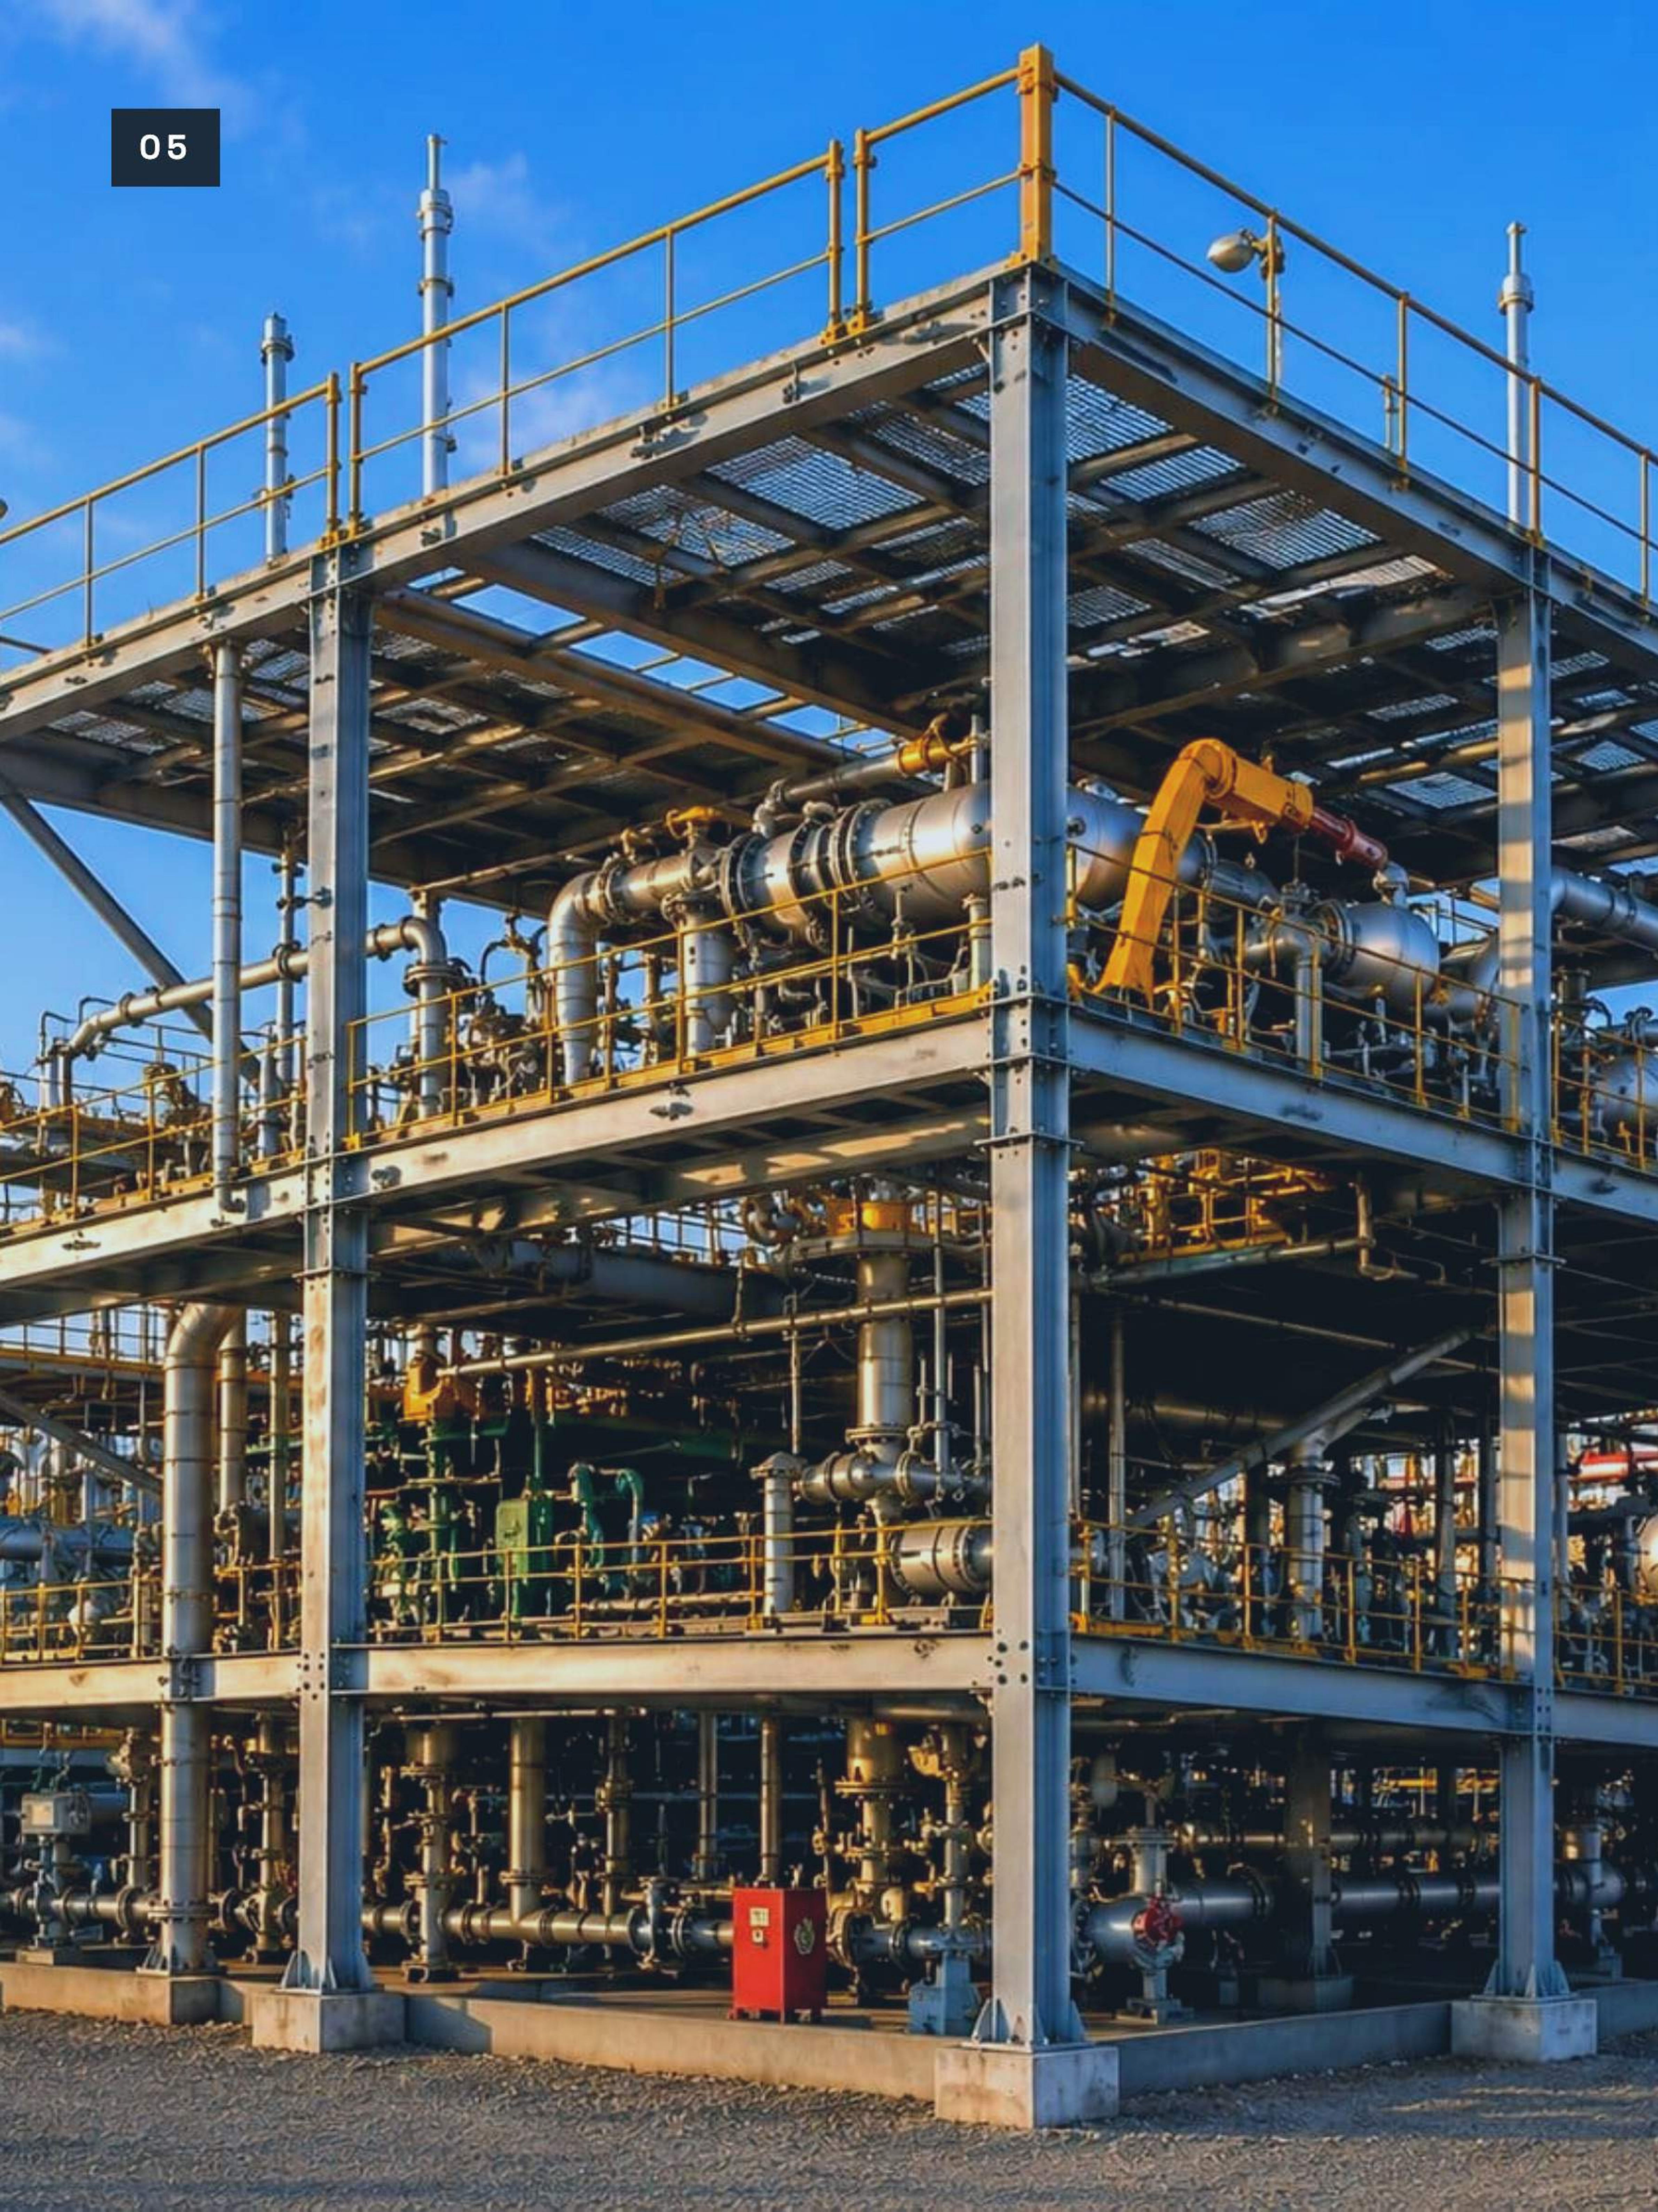

MASSA CARRARA, IT • 2024

RAVENNA, IT • 2025

MODENA, IT • 2025-26

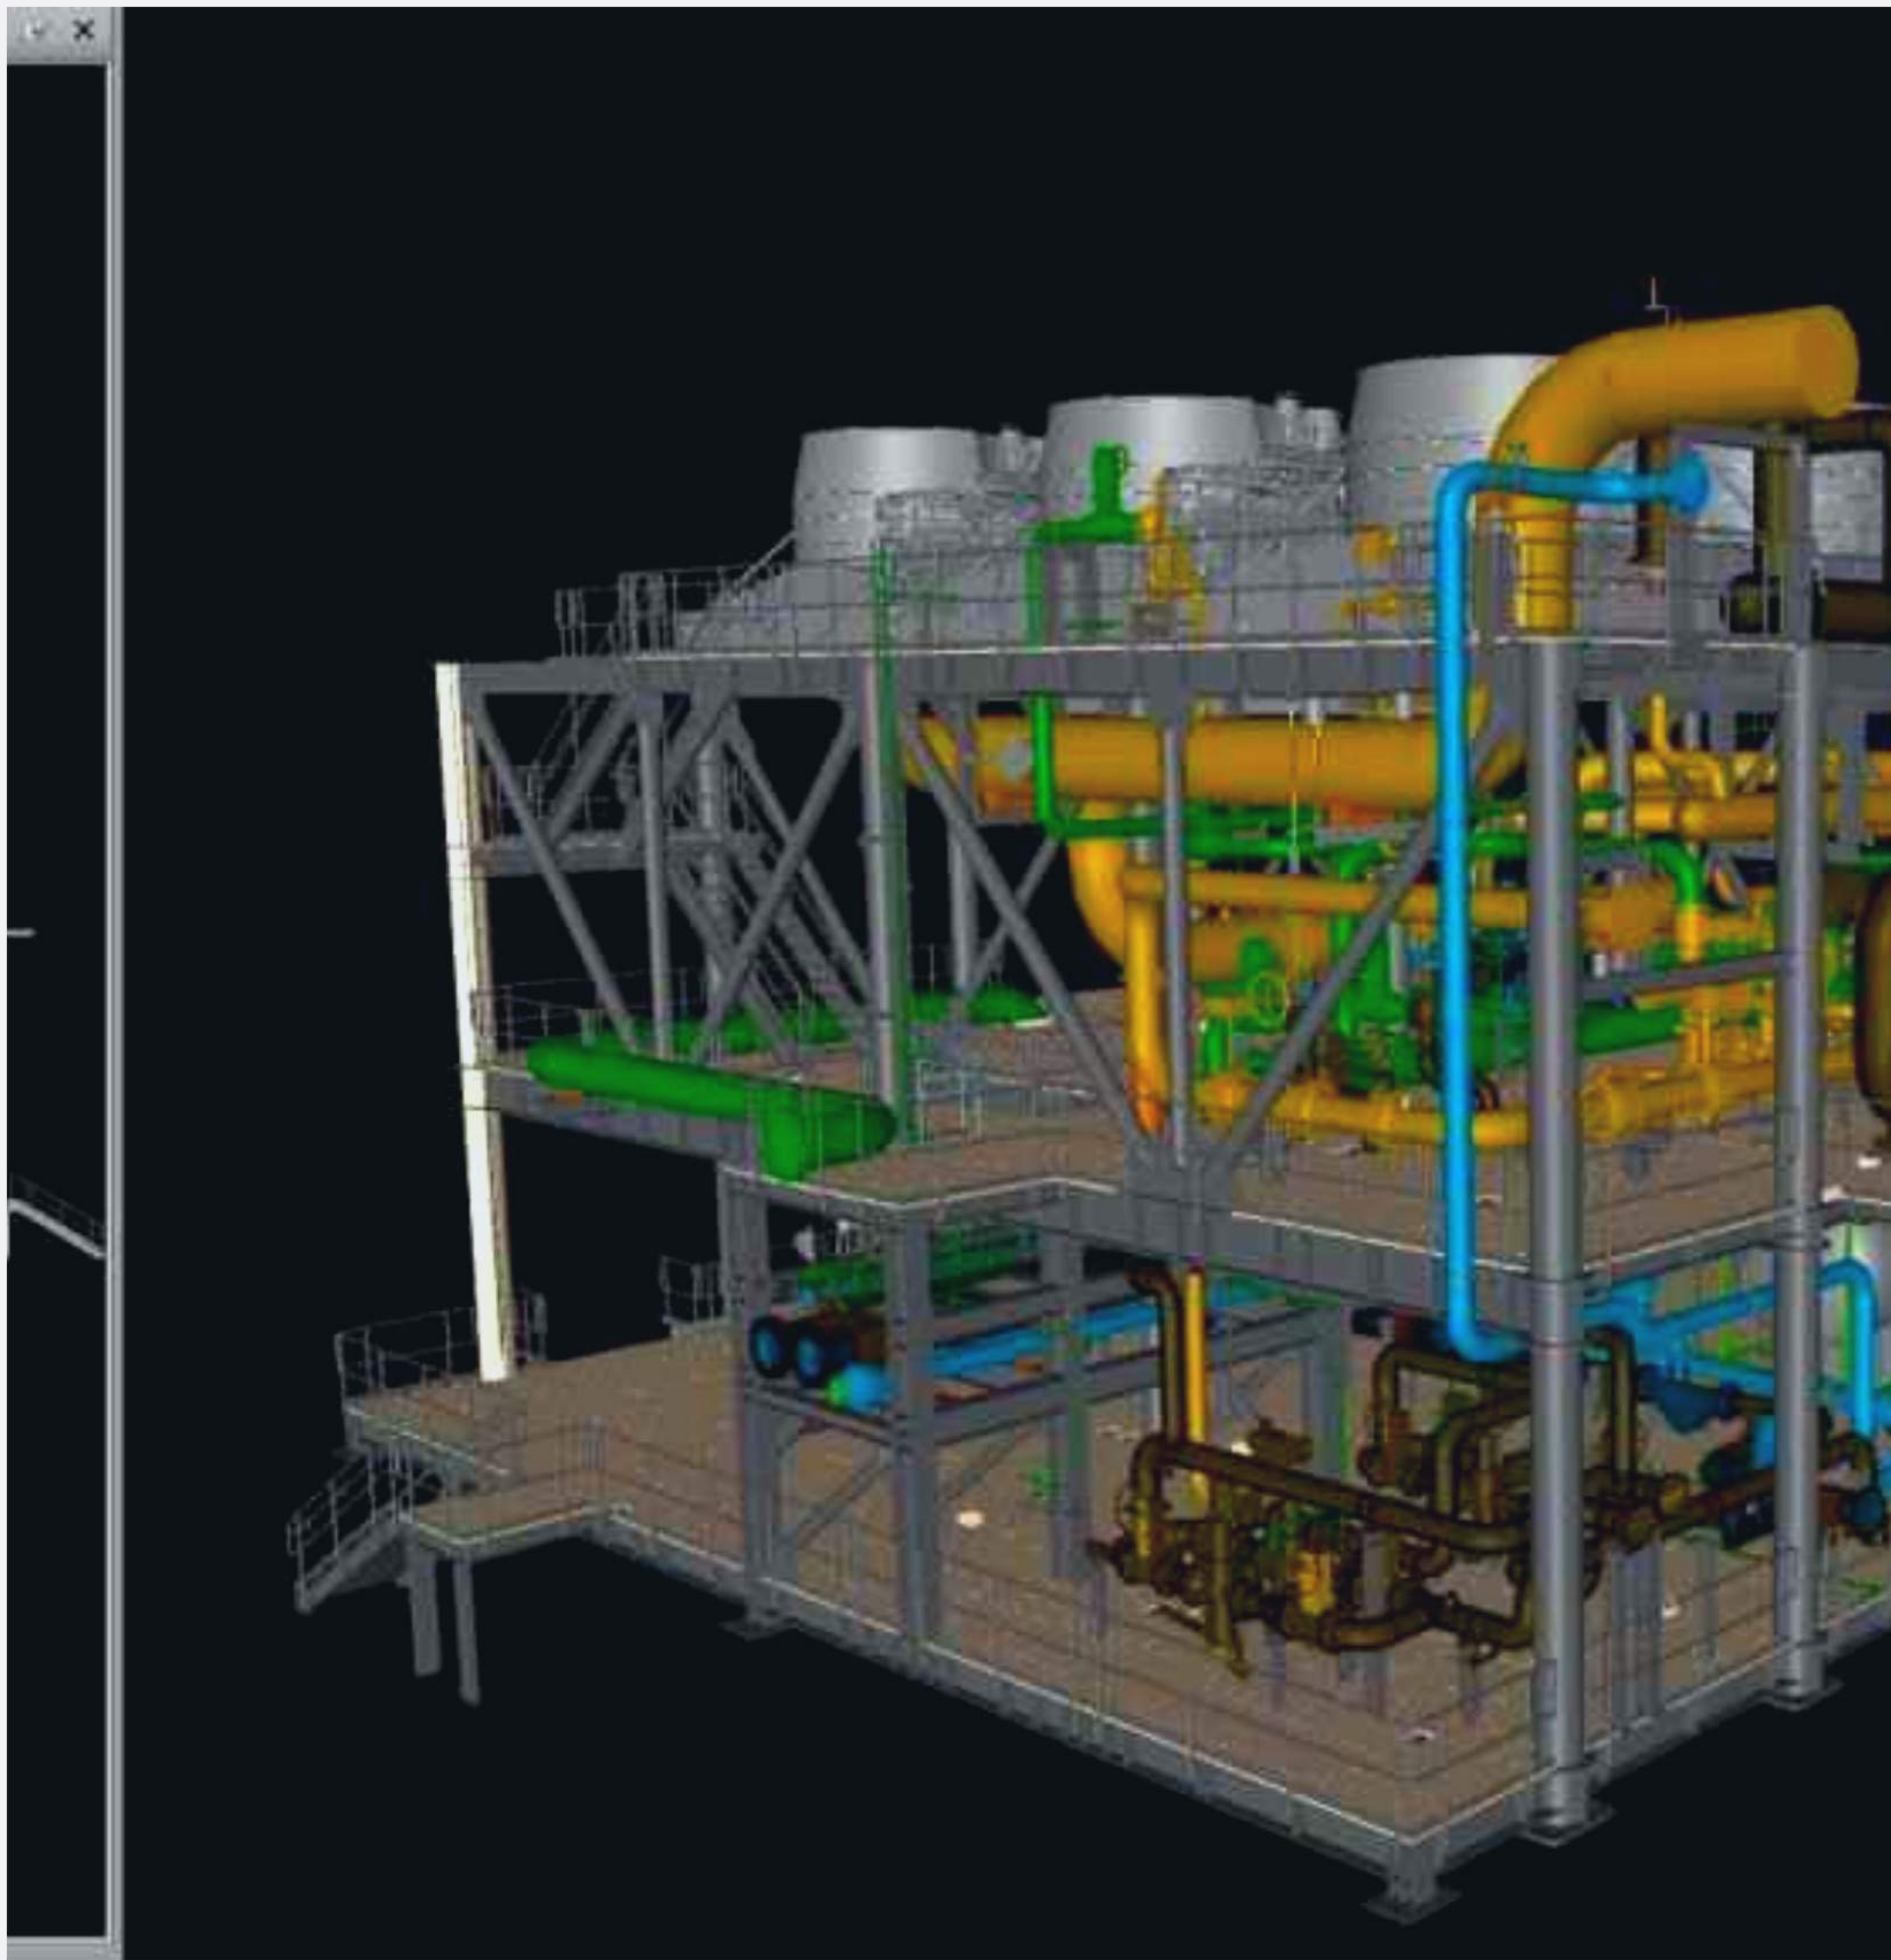

EPC SERVICES

EPC services

Integrated management of engineering, procurement and construction for energy, gas, water and industrial infrastructure.

- Engineering: basic and detailed design
- Procurement: qualified materials and components
- Construction: site works, assembly and welding
- Commissioning: testing and start-up

MASSA CARRARA, IT · 2024

BAUMGARTEN, AT · 2024

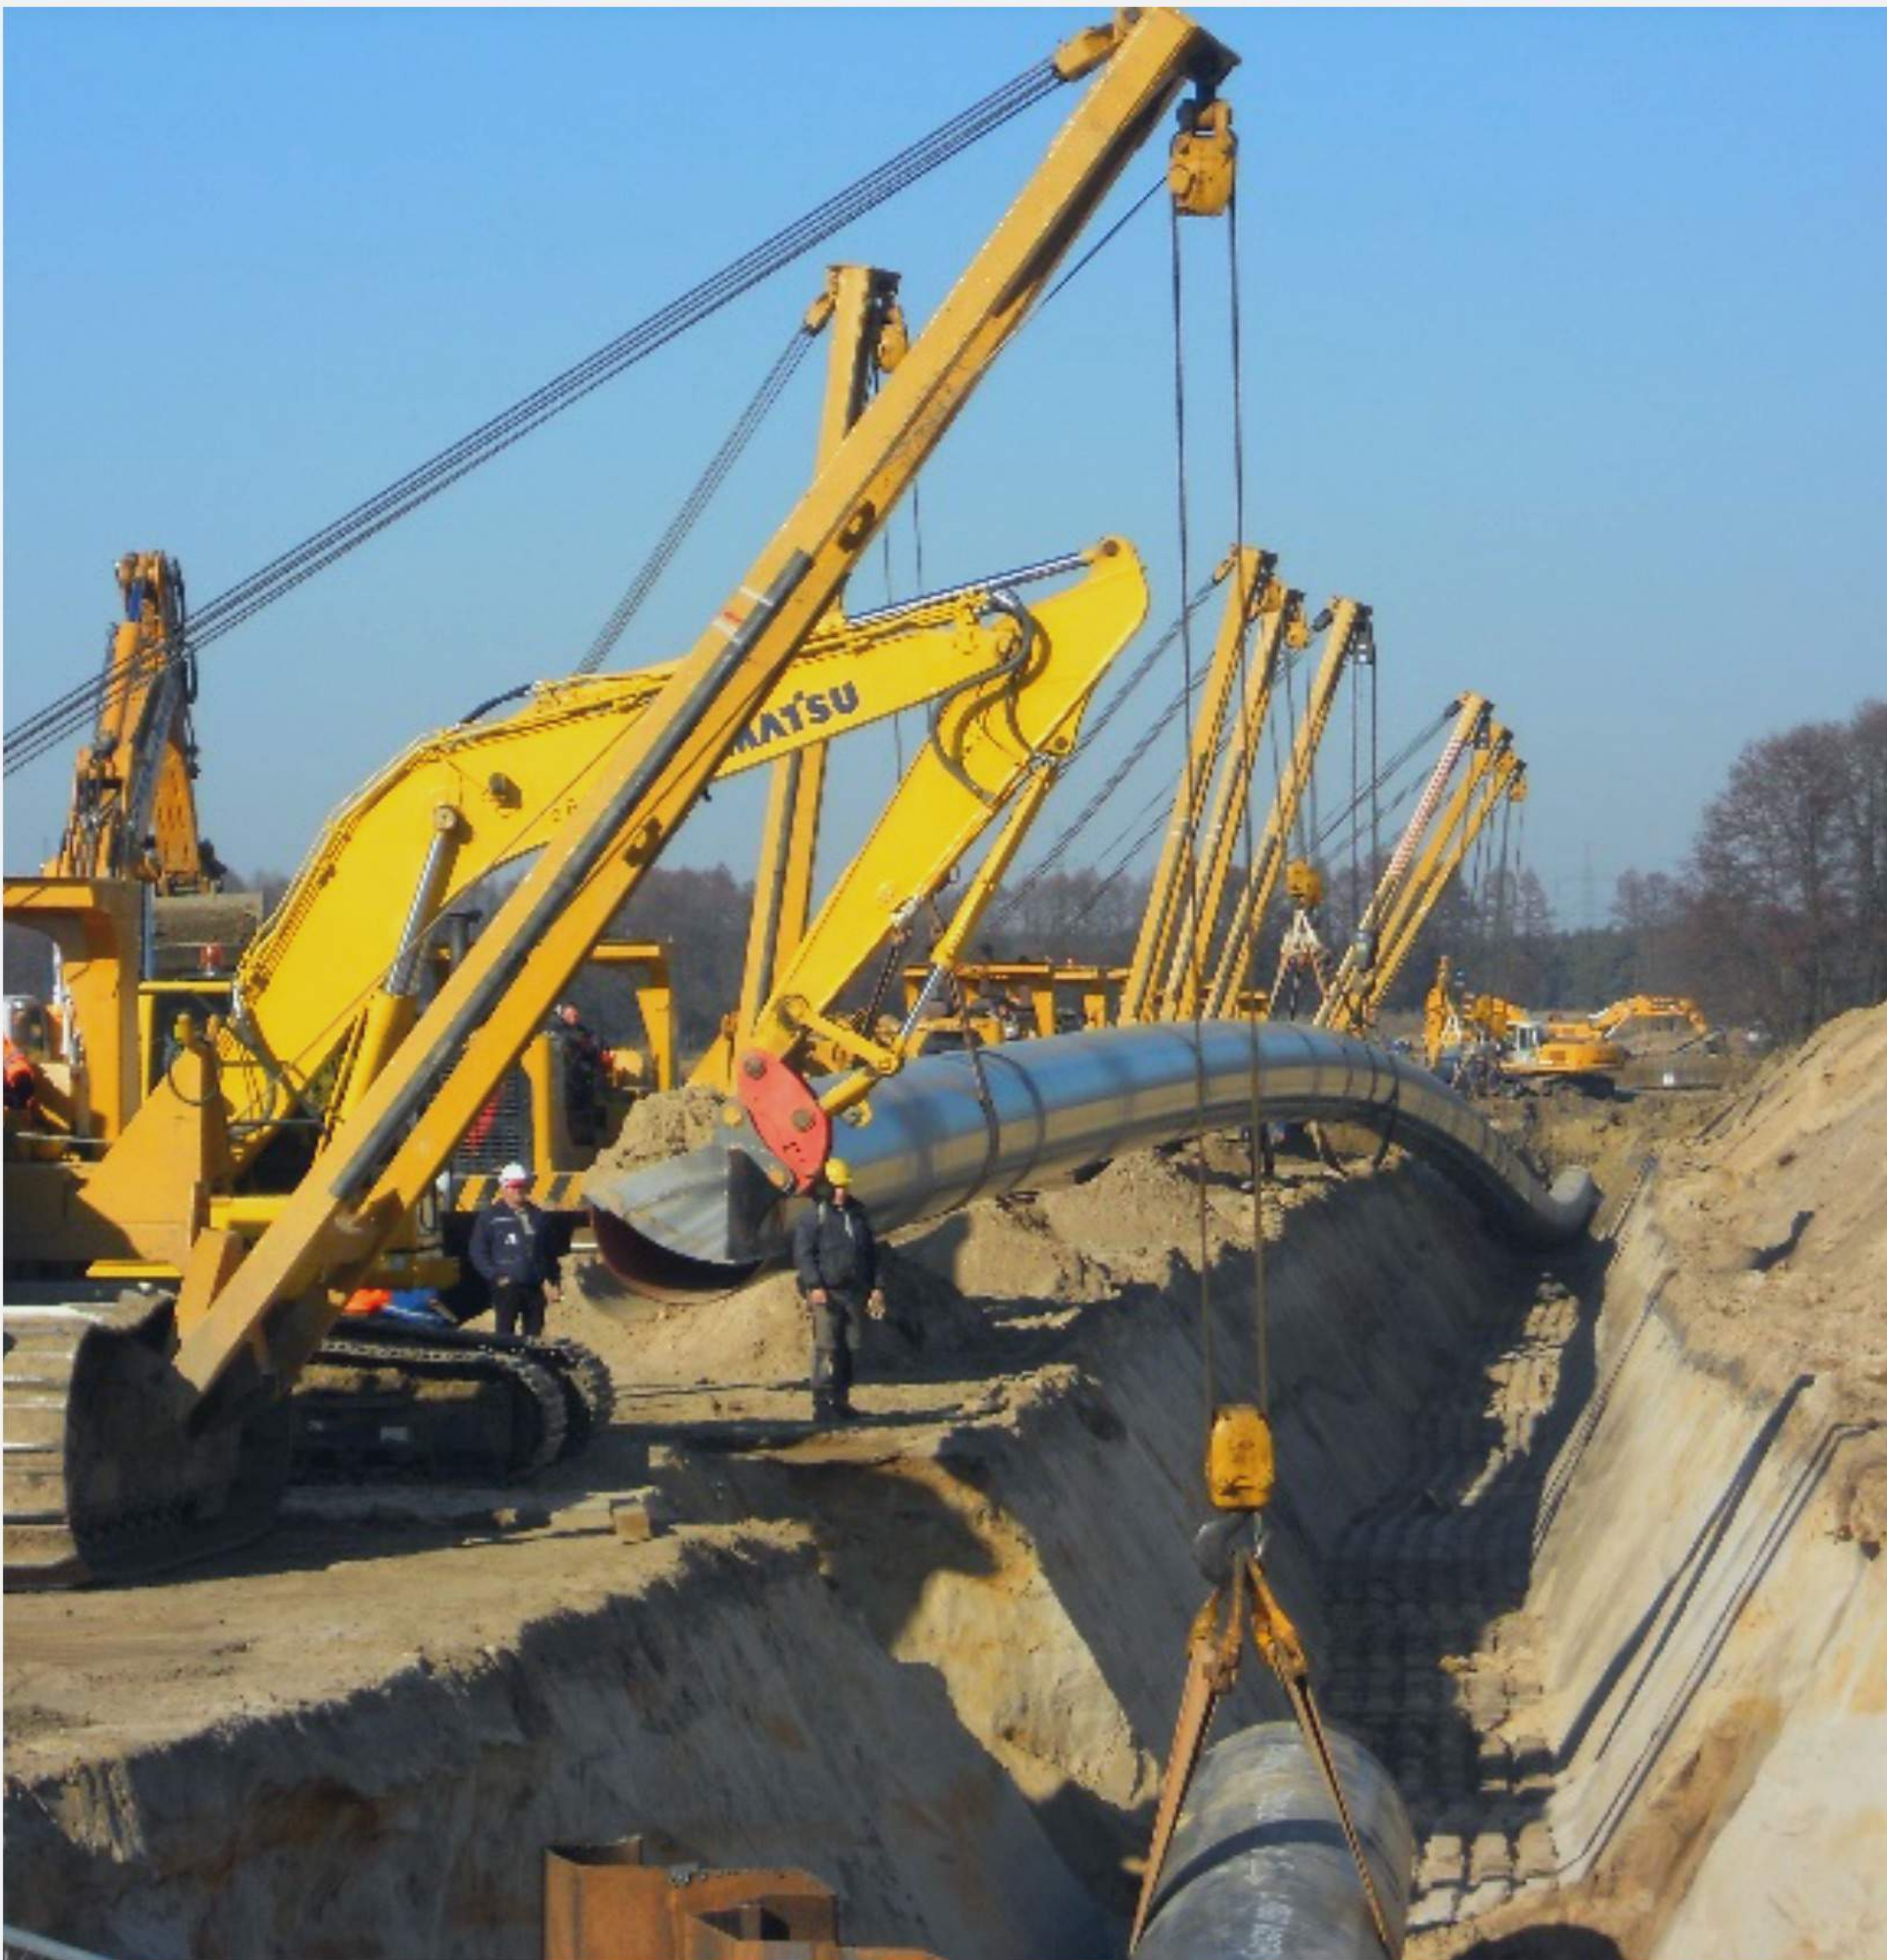

GRAFENDORF, AT · 2024

Energy transition

Construction and upgrading of pipelines and plants, with assembly and integration of equipment for hydrogen, biomethane and renewable gases.

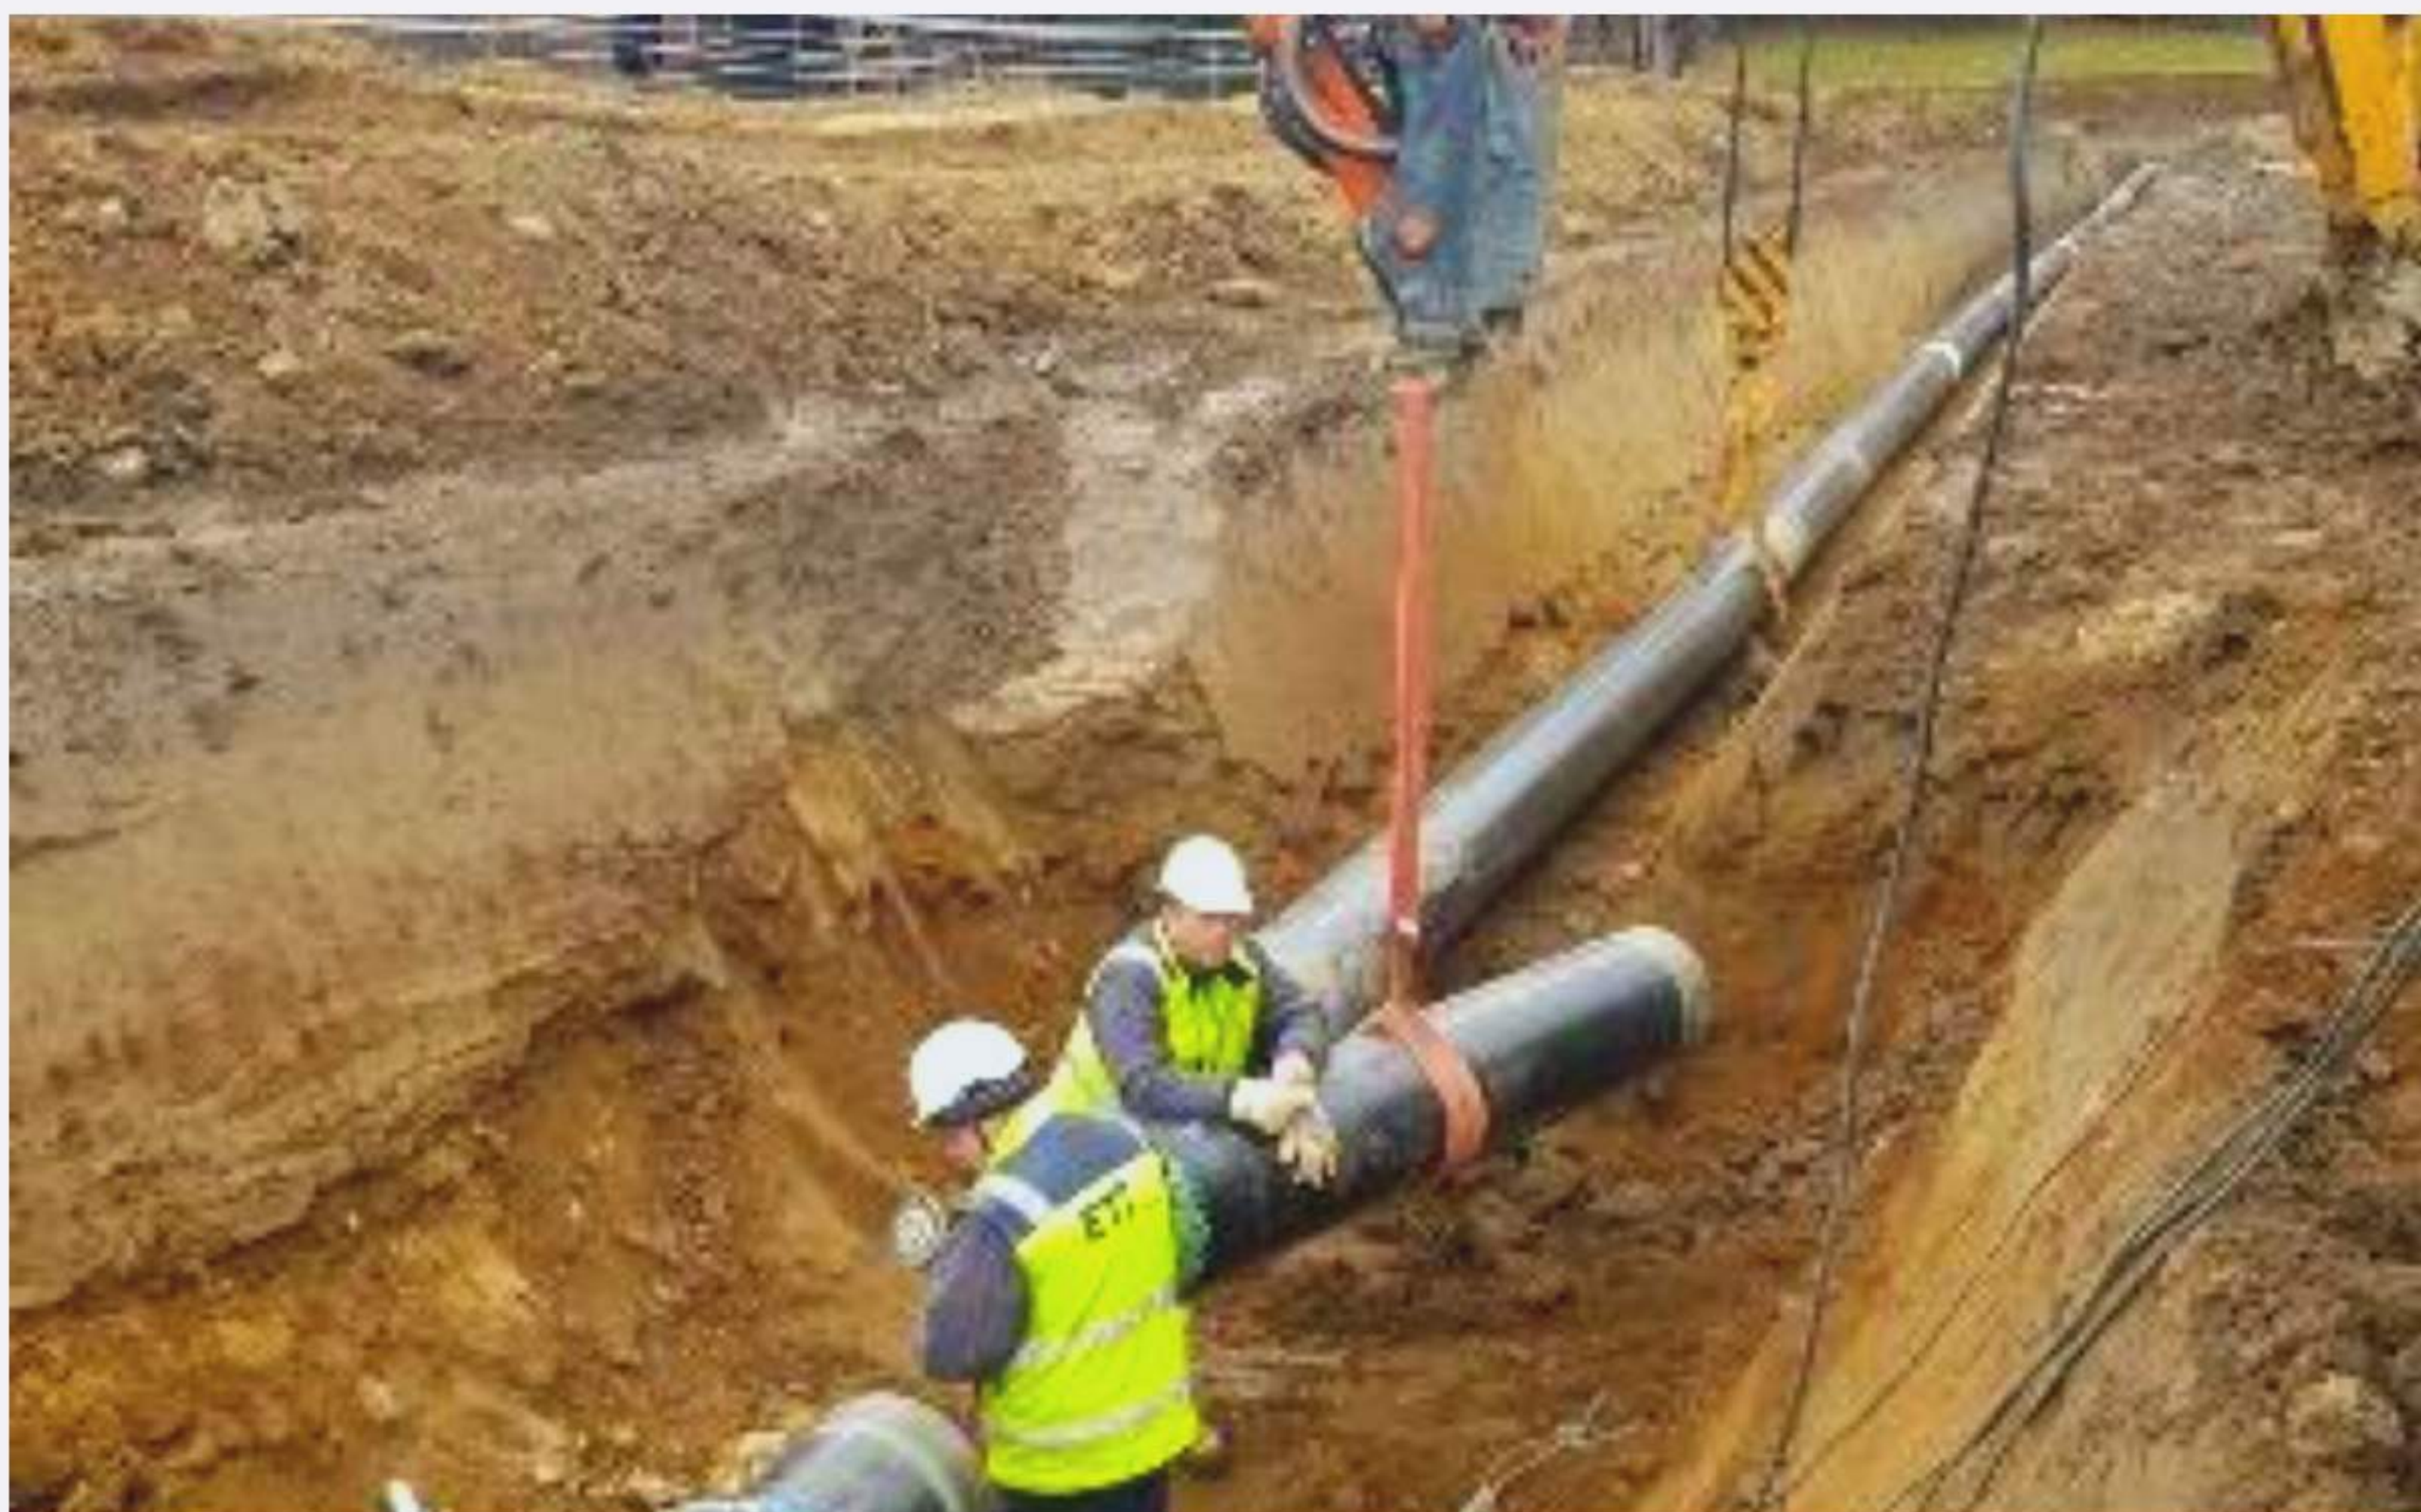

- Hydrogen facilities
- Biomethane and renewable gases
- Upgrading existing networks
- Metering and control systems

AT • 2026

TRABOCH, AT • 2026

AT • 2026

MARINE WORKS

Marine works

Assembly of piping systems and construction of steelwork and outfitting components on board vessels.

- On-board piping
- Metal structures
- Outfitting components
- Shipyard works

MONFALCONE, IT · 2023-24

MONFALCONE, IT · 2024

MONFALCONE, IT · 2024

GAS AND DISTRICT HEATING NETWORKS

Gas and district heating networks

Construction, extension and maintenance of local gas distribution and district heating networks, including branches and service connections.

- Urban distribution networks
- Branches and service connections
- District heating
- Maintenance and repairs

PONTE NELLE ALPI (BL), IT · 2024-25

How we work

Quality, punctuality, safety and leadership: four constants on every site.

WE WORK WITH

Clients and partners

Clients and partners we have delivered works with in Italy and across Europe.

Certifications and qualifications

MANAGEMENT SYSTEMS

UNI EN ISO 9001:2015

Quality management system.

ISO 45001:2018

Occupational health and safety.

EN 1090

Execution of steel and aluminium structures.

Synesgy ESG Rating

Supply chain sustainability assessment.

ISO 14001:2015

Environmental management system.

UNI EN ISO 3834-2:2021

Quality requirements for fusion welding of metallic materials.

SA8000:2014

Social accountability and working conditions.

SOA qualifications

SOA attestations for public works: the categories and value classes ETI is qualified for.

OG6 CLASS VI Aqueducts, gas, oil pipelines, irrigation and drainage works.	OG1 CLASS I Civil and industrial buildings.	OG3 CLASS I Roads, bridges and transport infrastructure.	OS7 CLASS II Finishing of general building and technical works.
